

NutBall Quarter Glass Removal Tool

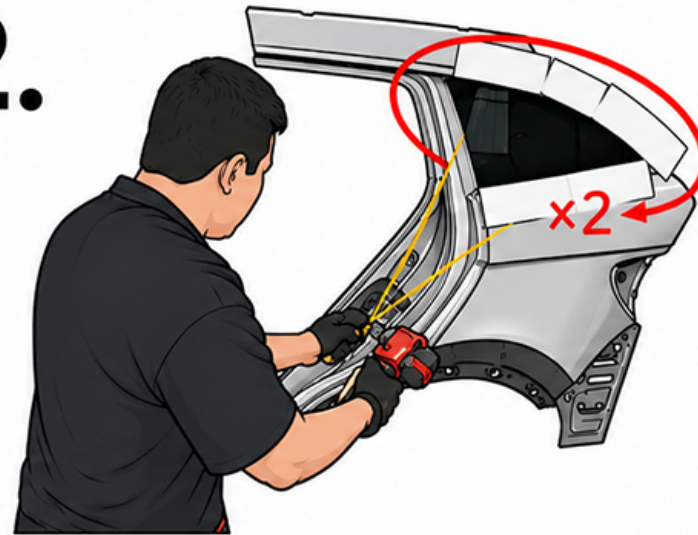

1.

Cut the pillar **as far as you can** to prevent damage to the tool and achieve better results.

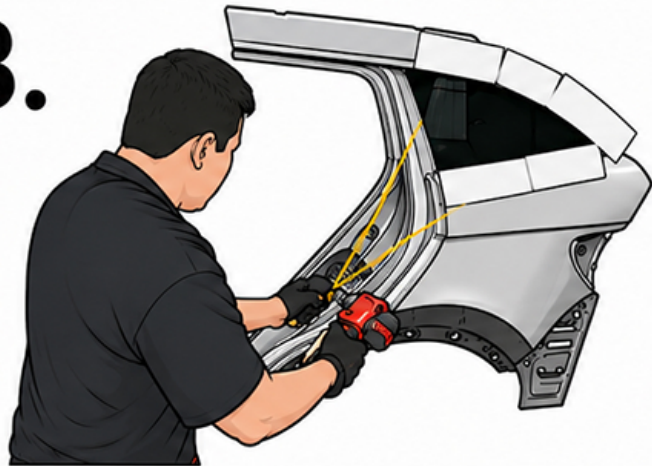

2.

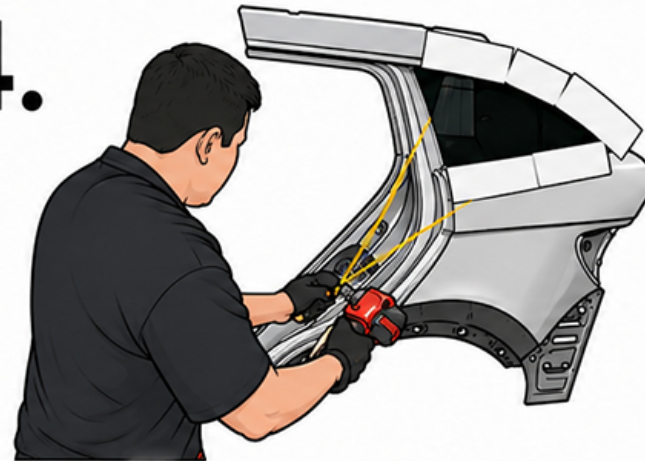

Wrap the line twice, also known as **double loop** (Invented by **Luis Hernandez**). And add Plastic Protectors.

3.

Cut using the **correct side** of the nut ball, either **DS** or **PS**

4.

Use a **right rotation** when cutting to ensure the Nutball is anchored on the strike, on both the driver's and passenger's sides.

IMPORTANT: Always wear safety glasses and gloves. Make sure the area is clear before cutting.
